ACE840TT

8" STEREO DVC TRIMLESS CEILING SPEAKER

120W • 8Ω • 38Hz - 20kHz • White

Ordering

Model ACE840TT • Sold as a single speaker • White, paintable magnetic grille • 10-year warranty

The OSD Audio ACE840TT, like its younger sibling the ACE640TT, delivers smooth two-channel stereo sound from a single trimless in-ceiling speaker - in half the space of a standard speaker pair. It is made for whole-house audio in rooms that have a stereo signal but space for only one speaker.

Stereo from One Speaker

The dual voice coil woofer plays both left and right channels through one cone, giving you smooth two-channel sound where only one speaker fits - in half the space of a standard pair.

More Bass Than the 6.5" Version

The 8" fiberglass woofer gives more bass and covers a larger area than the ACE640TT, making it the better pick for bigger single-speaker rooms.

Dual Titanium Tweeters

Dual 1/2" titanium-coated dome tweeters handle the highs for both channels, so music sounds balanced and detailed from one spot in the ceiling.

Trimless Magnetic Grille

The micro-flange grille is held on by strong magnets for quick installation and minimal visual impact.

Simple Install

Spring-loaded binding posts for left and right inputs, plus built-in dog-ear installation brackets.
