ACE640TT

6.5" STEREO DVC TRIMLESS CEILING SPEAKER

120W • 8Ω • 45Hz - 20kHz • White

Ordering

Model ACE640TT • Sold as a single speaker • White, paintable magnetic grille • 10-year warranty

The OSD Audio ACE640TT gives you smooth, two-channel stereo sound from a single 6.5" trimless in-ceiling speaker. It takes up half the space of a standard speaker pair, which makes it the right fit for whole-house audio in rooms that have a stereo signal but space for only one speaker.

Stereo from One Speaker

The dual voice coil woofer plays both left and right channels through one cone, so you get full two-channel sound where only one speaker fits - with half the cutouts of a standard pair.

Made for Tight Spaces

Ideal for bathrooms, hallways, closets, laundry rooms and small bedrooms in a whole-house audio system - any room with a stereo signal but room for just one ceiling speaker.

Dual Tweeter Design

A 6.5" fiberglass cone woofer works with dual 1/2" titanium-coated dome tweeters, one per channel, for smooth, balanced sound.

Trimless Magnetic Grille

The micro-flange grille is held on by strong magnets and sits flush to the ceiling for a clean look.

Simple Install

Spring-loaded binding posts for the left and right inputs, plus a dog-leg mounting system built into the frame.
