ICE1080HD

10" 3-WAY IN-CEILING SPEAKER

150W • 8Ω • 30Hz - 20kHz • 89 dB

Ordering

Model ICE1080HD • Sold as a single • Paintable grille • 10-year warranty

The OSD Audio ICE1080HD is a true 3-way 10" in-ceiling speaker for home theaters, media rooms and dedicated listening spaces. A 10" woofer, 2.5" midrange and 1" silk dome tweeter each handle their own range, with bass that reaches down to 30Hz.

True 3-Way Sound

10 inch injected composite paper cone woofer, 2.5 inch treated paper cone midrange and 1 inch ferrofluid cooled silk dome tweeter each handle their own range for clean highs, clear vocals and full bass.

Deep Bass From the Ceiling

The large 10 inch woofer reaches down to 30Hz, so movies and music keep their weight and impact even in larger rooms or systems without a dedicated subwoofer.

Aim the Sound

Pivoting midrange and tweeter can be pointed toward your seating area for sharper dialogue and better imaging, ideal for home theater surrounds and off-center ceiling placement.

150W Power Handling

89 dB sensitivity and 8 ohm impedance work with most AV receivers and stereo amplifiers; gold-plated 5-way binding posts accept bare wire, pins or banana plugs.

Check the Fit

Needs a 12.17" cutout and 6.3" of clearance above the ceiling; the slightly domed paintable grille is 13.58" across. Dog ear clamps, no brackets needed.

Specifications

Type	10" 3-way flush mount ceiling speaker
Woofer	10" injected composite paper cone
Midrange	2.5" treated paper cone
Tweeter	1" ferrofluid cooled silk dome
Frequency Response	30Hz - 20kHz
Power Handling	150W
Sensitivity	89 dB (1W/1m)

Impedance	8 Ohms
Outer Diameter	13.58"
Mounting Depth	6.30"
Cutout Diameter	12.17"
Sold As	Single
Warranty	10 Years
